## Curriculum Development

- *Case Integration Laboratory III (PT 654) (2010):* Involvement in the development of the pediatric “Focused Study” unit of this course which involved assisting the course master select seminar topics and recruit and coordinate guest lecturers for the seminars in which I was involved.
- *Program Innovations Council: Member (2012 – 2013):*
  - This committee was comprised of faculty, staff, and students, and met semiannually to brainstorm areas of and methods for improvement across all divisions within the Program, including the DPT curriculum.
  - Participation was by invitation only and committee members were rotated out yearly by the Program Director at the time.
- *Pediatric Neuromuscular Movement System Diagnosis Committee: Member (2012 – 2017):*
  - Work with a team of current and former faculty to modify the curriculum regarding diagnosis and treatment of patients with neuromuscular movement system impairments so that it is more generalizable to the pediatric population.
  - This content is taught within the curriculum and used by students and graduates in their practice.
- *Movement System Impairment (MSI) Development Committee: Member (2012 – 2017):* This group of current and emeritus faculty with expertise in the area of musculoskeletal physical therapy is responsible for the creation, modification, and instruction of the majority of the musculoskeletal curriculum taught in our Program.
- *Health Professions Student Leadership Council (2013):* Collaboration with a council member to create a pediatric patient case for physical therapy, occupational therapy, nursing, pharmacy, medical, and audiology students to work through together in an effort to foster a team-based and inter-professional approach to patient care.
- *Diagnosis & Management of Musculoskeletal Conditions III (PT 638):*

- Creation of two group case assignments on torticollis and idiopathic toe walking for which assessed the students' clinical decision making with pediatric patients. (2016)
  - Creation of 10 multiple-choice exam questions on content related to the management of musculoskeletal conditions in children for the final written exam in the course. (2016)
- *Pediatric curriculum review (2016 – 2017)*: Tasked with performing a complete review of the pediatric content within our DPT curriculum. This included mapping when and where all the content was delivered, comparing to American Physical Therapy Association (APTA) and Academy of Pediatric Physical Therapy published guidelines and criteria, and presenting the results to the WashU PT Curriculum Committee.
- *Diagnosis & Management of Neuromuscular Conditions II (PT 643) (2017)*: Creation of a new pediatric case study “Sully” for the laboratory experience “Complex Case Examples: Home Exercise Assignment.”
- “A Hybrid Model of Essential Clinical Skills I” (March 20, 2018): Presentation given to WashU PT faculty on how the largest laboratory course in the curriculum could be modified to fit a hybrid learning curriculum based on data compiled and analyzed from the previous academic year.
- *Professional Issues and Skills Development II (PT 615) (2020)*: Development of a series of learning experiences and assignments to replace Early Clinical Experience I for 1<sup>st</sup> year students in light of the COVID-19 pandemic which involved near-peer learning with 2<sup>nd</sup>- and 3<sup>rd</sup>-year students, case-based activities, and a reflection paper on students' own errors.
- *Essential Clinical Skills I (PT 603) (2020)*: Transformation of this 10-hour-per-week lecture/laboratory course into a hybrid format, using foundations of digital pedagogy to create net-new asynchronous preparatory learning materials, plans for 4 hours per week of in-person laboratory sessions, and virtual synchronous sessions.
- *Clinician / Scholar / Educator Thread (2022-2023)*: Creation of the curriculum for the pediatric clinician subgroup of the Thread within Phase 3 of the DPT curriculum, including organization of content experts, journal clubs, guest speakers, patient subjects, field trips, and the culminating activity.

## MENTORSHIP AND SPONSORSHIP RECORD

### Mentorship of Graduate Students and Professionals

- *Advisor, Case Integration III (PT 654) & Diagnosis and Evidence Analysis in PT Practice III (PT 650)*: Mentorship of third-year students as they write their final case report on a patient that was under their care in one of their final two clinical rotations, and as they synthesize the literature in reference to a clinical question related to one of their final two clinical rotations. 1-2 students per year. (2006 – 2021)
- *Advisor, Case Integration III (PT 654)*: One-on-one clinical instruction and mentorship of DPT students who chose pediatrics as an elective specialty area of practice for focused study. Students were required to complete 3 days of clinical observation in a specialty area of practice and devise a clinical question regarding a topic of interest both to the student and mentor, which they answered with a review and synthesis of the literature on the topic.
- *Cynthia Greifzu, PT, MPT, Physical therapist at Mercy Hospital St. Louis (2009 – 2020)*: Provision of mentorship for this therapist as she makes the transition from treating adults in the inpatient setting to infants and children in the inpatient and outpatient settings. This

includes observation and supervised practice of skills including the specialties of NICU/PICU practice and splinting and bracing.

- *Nicole Waite, PT, MPT, Recent graduate of University of Findlay Program in Physical Therapy (2013):* Provided mentorship through the APTA Academy of Pediatric Physical Therapy (formerly the Section on Pediatrics) Mentoring Program. Time was set aside multiple times over the year to discuss current challenging cases, orthosis management, continuing education, and work-life balance.
- *Jenna Washabaugh, SPT, DPT Student, WashU Program in Physical Therapy (2014):* Provided mentorship in writing final case report within the curriculum which resulted in acceptance of the case report as a poster presentation at the 2014 APTA Academy of Pediatric Physical Therapy Annual Conference. The abstract was published in the winter 2014 edition of *Pediatric Physical Therapy* and was submitted for the 2016 IV Step Conference in Columbus, OH.
- *Advisor & Member, Clinical Education Team, WashU Program in Physical Therapy (2016 – Present):* The Clinical Education program challenges students to think critically, integrate concepts and techniques into clinical care, and reflect on clinical experiences. The clinical education courses are an integral component of the curriculum where students develop their professional, communication, patient examination, diagnosis, and intervention skills.
  - Advisement of one quarter of each class of DPT students (20-22 per class)
  - Collaboration between clinical and academic faculty in developing curriculum that fosters clinical reasoning, inquiry, and ethical decision making
  - On-site evaluation of practicum students and clinical partners (See “Other educational contributions”)
  - Facilitation of acquisition of new clinical partners
